Salesforce Lightning

Apex programming

Visualforce development

Data management and architecture

Integration with external systems

Security model implementation

Report and dashboard creation

User training and support

Customization and configuration

Performance optimization

## AREA OF INTEREST

---

AWS CLOUD ADMINISTRATION  
SALESFORCE DEVELOPER

## EXPERIENCE

---

**Backend Developer Intern**  
S IT SOLUTION, PUNE

Aug 2023 - Oct 2023

Backend Developer with 3 Months of experience. I gained hands-on experience in creating and managing the backend of web applications. I worked on writing basic code, connecting applications to databases, and ensuring smooth data flow. I learned to use tools like MySQL for database management and worked with programming languages like Python. I also helped in solving errors, improving system performance, and understanding how APIs work. This experience helped me build a strong foundation in backend development and teamwork.

## PROJECTS

---

**Blood Bank Management System-** This project aimed to provide an efficient and streamlined solution for managing various aspects of Blood Bank, blood stock, customer records, appointment scheduling and sales tracking.

KEY SKILL- Asp.Net, MySQL.
